## Recipe_1:
##
:0 :
* ^From.*purdue\.edu
* ^Subject.*404
my404Folder
```

```
## Recipe_2:
##
## This recipe will only be invoked if the subject line
## contains the string 'sports' This email will go into
## your mailbox for the special account. You need to
## replace the 'your_special_account_name' string with what
## applies to you
##
:0 :
* ^Subject.*sports
/var/mail/ece40417
```

```
## Recipe_3:
##
## This is an emailing recipe. It will send to your regular
## Purdue webmail account all messages that originate from
## the purdue.edu domain and that have survived the previous
## recipes.
##
##
## IMPORTANT NOTE: The email address in the last line of the
## recipe is your Purdue webmail address — the address on
## which you normally receive your email DO NOT put your
## special account name in that line since that would create
## an infinite loop.
```

```

##
:0 :
* ^From.*(purdue\.edu[ ]|purdue\.edu>)
!qiao22@purdue.edu

## Recipe_4:
##
## This is one of the recipes in your instructor's spam
## filter. If your drug related spam does not originate from
## Purdue, this recipe will kick in.
##
## IMPORTANT: Since spammers fake their headers, a spam
## message actually coming from outside Purdue may still
## look like it is coming from Purdue.
##
